Finally, this book would help the aspirants, teachers' community and trainers to the maximum information and sources supplied with this.

This state-of-the-art volume is the first to capture a hybrid discipline that studies the role and linguistic implications of the human mind in language learning and teaching. This Handbook considers individual as well as collective factors in language learners and teachers from an array of new empirical constructs and theoretical perspectives, including implications for practice and "myths, debates, and disagreements" in the field, and points to future directions for research. This collection of stellar contributions is an essential resource for researchers, advanced students, and teachers working in applied linguistics, second language acquisition, psychology, and education.

Considerable research in the past 30 years has accumulated regarding the academic and social functioning of youngsters with disabilities. Only in the past decade has there been sufficient special education research published from which meta-analyses and syntheses can be conducted. In this volume, seven sets of authors grapple with synthesizing the knowledge base on an array of critical topics in the field of special education. Among others, specific chapters include: * a synthesis of what is known about effective instructional grouping practices for reading. * an examination of the differences between students classified as learning disabled and other low-achieving students on a range of academic performance measures. * a review of effective instruction for English-language learners. * an examination of the research on behavioral supports for low-incidence special education populations. * a synthesis oh how technology supports literary development, across the full spectrum of disabilities categories. These papers provide up-to-date, informative summaries of current knowledge and a base from which further venture into the critical area of instructional intervention in special education can occur.

This book provides comprehensive coverage of the latest advances and trends in information technology, science and engineering. Specifically, it addresses a number of broad themes, including multi-modal informatics, data mining, agent-based and multi-agent systems for health and education informatics, which inspire the development of intelligent information technologies. The contributions cover a wide range of topics such as AI applications and innovations in health and education informatics; data and knowledge management; multi-modal application management; and web/social media mining for multi-modal informatics. Outlining promising future research directions, the book is a valuable resource for students, researchers and professionals, and a useful reference guide for newcomers to the field. This book is a compilation of the papers presented in the 2021 International Conference on Multi-modal Information Analytics, held in Huhehaote, China, on April 23-24, 2021.

This book introduces an approach to understanding and measuring working memory components and functions in second language learning, processing and development. It presents comprehensive, thorough and updated reviews of relevant literatures from cognitive sciences and applied linguistics. Drawing on multidisciplinary research, the book advocates a conceptual framework for integrating working memory theories with second language acquisition theories. An innovative theoretical model is also presented, which illuminates research studies investigating the distinctive roles of phonological and executive working memory as they relate to specific L2 learning domains, skills and processes. Theoretical and methodological implications of this integrative perspective are further elaborated and discussed within the specific realms of L2 task-based performance and language aptitude research.

This landmark volume provides a broad-based, state-of-the-art overview of current knowledge and research into second language teaching and learning. Fifty-seven chapters are organized in eight thematic sections: *social contexts of second language learning; *research methodologies in second-language learning, acquisition, and teaching; *contributions of applied linguistics to the teaching and learning of second language skills; *second language processes and development; *teaching methods and curricula; *issues in second or foreign language testing and assessment; *identity, culture, and critical pedagogy in second language teaching and learning; and *important considerations in language planning and policies. The Handbook of Research in Second Language Teaching and Learning is intended for researchers, practitioners, graduate students, and faculty in teacher education and applied linguistics programs; teachers; teacher trainers; teacher trainees; curriculum and material developers; and all other professionals in the field of second language teaching and learning.
