Landes- und kulturkundliche Inhalte sowie interkulturelle bzw. kulturreflexive Aspekte sind fester Bestandteil des Fremdsprachenunterrichts. Doch wie sieht das in der Praxis und in Lehrmaterialien aus? Dieser Band bietet Grundlagen zur Lehrwerk- bzw. Landeskundeforschung und erkundet deren konkrete Umsetzung in einer kontextualisierten Lehrwerkanalyse. Untersucht werden frequent im schulischen Deutsch-als-Fremdsprache-Unterricht eingesetzte Anfänger-Lehrwerke für Jugendliche aus Polen und den Niederlanden. Gelungene Beispiele für die Umsetzung unterschiedlicher landeskundlicher Inhalte und Lernziele aus internationalen Lehrmaterialien bieten Anregungen für ein breiteres Spektrum an landeskundlichen Aktivitäten und Lernzielen, die direkt in die eigene Praxis umgesetzt werden können. Cultural content as well as intercultural and culture-reflective aspects are key concepts in foreign language pedagogy. But how are these key concepts reflected in teaching practice and teaching materials? This book provides a sound theoretical basis of research concerning both teaching materials and culture pedagogy. In a contextualized textbook analysis, we explore to what extent research insights are integrated into six frequently used Dutch and Polish course books for beginning adolescent learners of German. A selection of good practice examples from international teaching materials display the implementation of various cultural contents and provide input for a wide array of cultural activities and teaching objectives, which can be directly implemented in teaching practice.

In Organizational Behavior: Solutions for Management, Paul Sweeney and Dean McFarlin have identified 4 key management skills areas that act as building blocks for successful behavior in management. These skills are: self-insight/perceptual skills; ability to inspire/motivate/lead; ability to analyze situations; and personal flexibility/adaptability. The authors also feel strongly that successful management of organizational behavior rests on the problem-solving process; in fact, the 4 skills listed above enable managers to use this process to deal with the "people problems" they face more effectively. If nothing else, studying what organizational behavior has to offer as a field should help a person figure out his/her strengths and weaknesses.

Long before strip malls, television and huge retail chains homogenized American culture, minor league baseball clubs represented individual, local ideals. Fans turned out in droves to see their hometown heroes, and teams were sources of civic pride and popular recreation. Gradually, these teams and leagues were either driven under or swallowed up by baseball's vertical integration, and by 1963 a significant piece of the American landscape had all but disappeared. This heavily researched reference work covers every official minor league All-Star team from 1922 (when the first such team was named) to 1962 (the last year of the AAA-D classification system). Each entry includes the full roster of an All-Star team, complete individual hitting and pitching statistics, and detailed commentary on the selections. Where sabermetrics indicate more-deserving players were passed over, the author presents the case for alternative candidates.

Errors are information. In contrastive linguistics, they are thought to be caused by unconscious transfer of mother tongue structures to the system of the target language and give information about both systems. In the interlanguage hypothesis of second language acquisition, errors are indicative of the different intermediate learning levels and are useful pedagogical feedback. In both cases error analysis is an essential methodological tool for diagnosis and evaluation of the language acquisition process. Errors, too, give information in psychoanalysis (e.g., the Freudian slip), in language universal research, and in other fields of linguistics, such as linguistic change. This bibliography is intended to stimulate study into cross-language, cross-discipline and cross-theoretical, as well as for language universal, use of the numerous, but sometimes hard to come by, error analysis studies. 5398 titles covering the period 1578 up to 1990 (with work in more than 144 languages and language families) are cited, cross-referenced, and described. The subject areas covered are numerous. For example: Theoretical Linguistics (Linguistic Typology, Cognitive Linguistics), Historical Linguistics (Language Change), Applied Linguistics (e.g. Speech Disorders), Translation, Mother Tongue Acquisition, Foreign Language Learning (Negative Transfer, Intralingual and Interlingual Errors), Psychoanalysis (Slips of the Tongue), Typography, Shorthand, Clinical Linguistics and Speech Pathology, Reading Research, Automatic Error Detection, Contact Linguistics (Code-switching, Interference), etc.
