Testing Statistical Hypotheses Lehmann Romano | hsm1.signority

Introduction. The third edition of Testing Statistical Hypotheses updates and expands upon the classic graduate text, emphasizing optimality theory for hypothesis testing and confidence sets. The principal additions include a rigorous treatment of large sample optimality, together with the requisite tools. In addition, an introduction to the theory of resampling methods such as the bootstrap is developed.

P3.9 from Lehmann, Romano, Testing Statistical Hypotheses. Let X distributed according to P ; 2 and let T sufficient for θ . If $\phi(X)$ is any test of a hypothesis concerning θ , then (T) given by $\phi(t) = E[\phi(X) | T = t]$ is a test depending on T only and its power is identical with that of $\phi(X)$. Solution:
