DRIVING FORCE –

*Now you're getting
somewhere*

Natural selection

Online Library

The Driving

Natural selection was found to be the major driving force of evolution with an increase in fitness of the individual. Some genotypes are adaptive to their environmental habitats and these 'fit' individuals pass on the alleles to the subsequent generation resulting in

Online Library

The Driving

increase of allele
frequency.

Evolution And

The Future

*Driving Forces of
Evolution -
Microevolution*

There's a reason that
attribute is lauded,
and it turns out to
have evolutionary
roots. EDWARD O.
WILSON. According
to Pulitzer Prize-
winning biologist

Online Library

The Driving

Edward O. Wilson,
groups are the driving
evolutionary force of
the human species.

It's the cooperators,
the team players who
set aside selfish
desires for the good
of the group, that
outcompete groups of
non-cooperators and
ensure their genes
are passed on to
future generations.
