processes of earth, water, fire, air and space are the essential materials of all existent phenomena or aggregates. The elemental processes form the basis of the calendar, astrology, medicine, psychology and are the foundation of the spiritual traditions of shamanism, tantra and Dzogchen.

Classical element - Wikipedia

The ancient Greeks believed that there were four elements that everything was made up of: earth, water, air, and fire. This theory was suggested around 450 BC, and it was later supported and added to by Aristotle.

The Four Elements of Matter: Earth, Water, Air, Fire

According to ancient and medieval science, aether (/ i

Tai r /), also spelled æther, aither, or ether and also called quintessence, is the material that fills the region of the universe above the terrestrial sphere. The concept of aether was used in several theories to explain several natural phenomena, such as the traveling of light and gravity.

Aether (classical element) - Wikipedia

The element of wood is associated with spring, a time of birth and new beginnings. “ The wood element refers to living, growing entities: trees, plants and the human body, ” writes Elson M. Haas, MD, in *Staying Healthy With the Seasons* (Celestial Arts, 2003), his classic book about integrative medicine first published in 1981.

an essential tool for understanding the Tao as it operates in the Cosmos, in the minds of sages, and in sacred texts. It is also one of the great philosophical poems in world literature, assessing the rival claims on human attention of fame, physical immortality, wealth, and power while it situates human endeavor within the larger framework of cosmic energies. The complete text of The Elemental Changes and its ten autocommentaries are here translated into accessible and, whenever possible, literal English. Following the Chinese tradition, supplementary comments are appended to each tetragram in order to indicate the main lines of interpretation suggested by earlier commentators.

Oxford Studies in Ancient Philosophy is a volume of original articles on all aspects of ancient philosophy. The articles may be of substantial length, and include critical notices of major books. OSAP is now published twice yearly, in both hardback and paperback. 'The serial Oxford Studies in Ancient Philosophy (OSAP) is fairly regarded as the leading venue for publication in ancient philosophy. It is where one looks to find the state-of-the-art. That the serial, which presents itself more as an anthology than as a journal, has traditionally allowed space for lengthier studies, has tended only to add to its prestige; it is as if OSAP thus declares that, since it allows as much space as the merits of the subject require, it can be more entirely devoted to the best and most serious

One of Springer ' s Major Reference Works, this book gives the reader a truly global perspective. It is the first major reference work in its field. Paleoclimate topics covered in the encyclopedia give the reader the capability to place the observations of recent global warming in the context of longer-term natural climate fluctuations. Significant elements of the encyclopedia include recent developments in paleoclimate modeling, paleo-ocean circulation, as well as the influence of geological processes and biological feedbacks on global climate change. The encyclopedia gives

the reader an entry point into the literature on these and many other groundbreaking topics.

This is the first book in any language to inquire into the emergence of childhood as a topic of significant cultural attention in Han times, as expressed in the intellectual discourse surrounding early Chinese cosmology, medicine, law, statecraft, and dynastic history.

This volume contains essays by twenty-two eminent scholars from across North America and Europe, examining various aspects of the Hebraic, Hellenic, patristic, medieval, and early modern understandings of God and creation.
