the market than the equivalent JORC Code, because the JORC Code is primarily a code for reporting the status of a mineral resource, whereas the NI 43-101 is a code of securities disclosure. This distinction is based on the derivation of the two codes: the JORC Code is derived from the Joint Ore Reserves ...

National Instrument 43-101 - Wikipedia
Mineral resource classification is the classification of mineral resources based on an increasing level of geological knowledge and confidence. In an effort to achieve a standard set the classifications, representative bodies from Australia, Canada, South Africa, the USA and the UK reached a provisional agreement in 1997 on the definitions of each of the various mineral classifications.
