This new edition of the most authoritative, comprehensive history of the French Revolution of 1789 draws on a generation of extensive research and scholarly debate to reappraise the most famous of all revolutions. Updates for this second edition include a generous chronology of events, plus an extended bibliographical essay providing an examination of the historiography of the Revolution. Opening with the accession of Louis XVI in 1774, the book traces the history of France through revolution, terror, and counter-revolution, to the triumph of Napoleon in 1802, and analyses the impact of events both in France itself and the rest of Europe. William Doyle shows how a movement which began with optimism and general enthusiasm soon became a tragedy, not only for the ruling orders, but for the millions of ordinary people all over Europe whose lives were disrupted by religious upheaval, and civil and international war. It was they who paid the price for the destruction of the old political order and the struggle to establish a new one, based on the ideals of liberty and revolution, in the face of widespread indifference and hostility.
The Oxford Handbook of the French Revolution brings together a sweeping range of expert and innovative contributions to offer engaging and thought-provoking insights into the history and historiography of this epochal event. Each chapter presents the foremost summations of academic thinking on key topics, along with stimulating and provocative interpretations and suggestions for future research directions. Placing core dimensions of the history of the French Revolution in their transnational and global contexts, the contributors demonstrate that revolutionary times demand close analysis of sometimes tiny groups of key political actors - whether the king and his ministers or the besieged leaders of the Jacobin republic - and attention to the deeply local politics of both rural and urban populations. Identities of class, gender and ethnicity are interrogated, but so too are conceptions and practices linked to citizenship, community, order, security, and freedom: each in their way just as central to revolutionary experiences, and equally amenable to critical analysis and reflection. This volume covers the structural and political contexts that build up to give new views on the classic question of the 'origins of revolution'; the different dimensions of personal and social experience that illuminate the political moment of 1789 itself; the goals and dilemmas of the period of constitutional monarchy; the processes of destabilisation and ongoing conflict that ended that experiment; the key issues surrounding the emergence and experience of 'terror'; and the short- and long-term legacies, for both good and ill, of the revolutionary trauma - for France, and for global politics.

The concluding volume in the 'Short Oxford History of France' series captures the essence of the huge transformations that have taken place in France since the late 19th century. A set of thematic chapters produces a re-evaluation of modern French history.

The kingdom of France, a byword for upheaval and instability for a century before 1660, was transformed over the subsequent generation into the greatest power in Europe and an institutional model admired and imitated almost everywhere. A further century elapsed befoer this hegemony waschallenged, and even then the collapse of monarchy in 1788 took most people by surprise. This book, bringing together an authoritative international panel of historians, portrays and analyses the life of France between two revolutions, a time later known as the old regime. All aspects of French lifear covered: the economy, social development, religion and culture, French activity overseas, and not least politics and public life, where our understanding has been completely renewed over recent years. A detailed chronology and full bibliography complete this compelling analysis of an age behindwhose calm and assured facade forces were developing which were to shape a very different country and continent.

The late 20th century saw a remarkable flourishing of philosophy in France. The work of French philosophers is wide ranging, historically informed, often reaching out beyond the boundaries of philosophy; they are public intellectuals, taken seriously as contributors to debates outside the academy. Gary Gutting tells the story of the development of a distinctively French philosophy in the last four decades of the 20th century. His aim is to arrive at an account of what it was to 'do philosophy' in France, what this sort of philosophizing was able to achieve, and how it differs from the analytic philosophy dominant in Anglophone countries. His initial focus is on the three most important philosophers who came to prominence in the 1960s: Michel Foucault, Gilles Deleuze, and Jacques Derrida. He sets out the educational and cultural context of their work, as a basis for a detailed treatment of how they formulated and began to carry out their philosophical projects in the 1960s and 1970s. He gives a fresh assessment of their responses to the key influences of Hegel and Heidegger, and the fraught relationship of the new generation to their father-figure Sartre. He concludes that Foucault, Derrida, and Deleuze can all be seen as developing their fundamental philosophical stances out of distinctive readings of Nietzsche. The second part of the book considers topics and philosophers that became prominent in the 1980s and 1990s, such as the revival of ethics in Levinas, Derrida, and Foucault, the return to phenomenology and its use to revive religious experience as a philosophical topic, and Alain Badiou's new ontology of the event. Finally Gutting brings to the fore the meta-philosophical theme of the book, that French philosophy since the 1960s has been primarily concerned with thinking the impossible.

This volume aims to provide a variety of points of entry to the history of France between 900 and 1200. It covers key themes such as France's political culture and identity, rural economy and society, the Church and intellectual history.

First published in 1980, this book rapidly established itself as the indispensable guide to what brought about the French Revolution, and to the debates of historians about the issue. It combined a full critical account of recent controversies with a fresh interpretation taking stock of where the debate had led. Since 1980 discussion among historians has continued as lively as ever, and has moved in directions scarcely explored at that time. The 'revisionist' criticism which destroyed the classic mid-century consensus emphasizing the Revolution's social and economic origins has opened the way to a 'post-revisionist' approach focused on cultural change. This new edition brings the subject up to date with an extensively rewritten survey of the historiography up to the present day, and a revised interpretation modified in the light of research by a new generation of scholars. It will thus remain the starting point for any serious study of the greatest of all revolutions, which lies at the root of the modern political world. 'important book . . . readable and perceptive analysis', Times Higher Education Supplement 'His book is excellent, achieving the rare distinction of being both useful and revealing', Spectator 'brief, clear, and thoughtful', Journal of Modern History

This collection of French short stories in translation expands our idea of French writing by including new stories by women writers and by authors of Francophone origin. Spanning the centuries from the late eighteenth to the late twentieth, the collection opens with a rumbustious tale from the Marquis de Sade, takes in the masters of the nineteenth century, from Stendhal and Balzac to Maupassant, and reaches to Quebec, Africa, and the French Caribbean in the twentieth century. Women writers include relatively well known figures such as Renee Vivien, Colette, and Beauvoir, and newer writers such as Assia Djebar, Christiane Baroche, and Annie Saumont. The French short story is a rich and diverse medium, but all the stories selected share a common characteristic: they make exciting reading.
