The second edition of this book is virtually a new book. It is the only comprehensive text on the safety of essential oils and the first review of essential oil/drug interactions and provides detailed essential oil constituent data not found in any other text. Much of the existing text has been re-

written, and 80% of the

text is completely new.

There are 400 comprehensive essential oil profiles and almost 4000 references. There are new chapters on the respiratory system, the cardiovascular system, the urinary system, the digestive system and the nervous system. For each essential oil there is a full breakdown of constituents, and a clear

concentrations. There
are also 206 Constituent
Profiles. There is
considerable discussion
of carcinogens, the
human relevance of
some of the animal data,
the validity of treating
an essential oil as if it
was a single chemical,

and the arbitrary nature
of uncertainty factors.
There is a critique of
current regulations.
