A handbook of Atlantean information for general readers and specialists alike! This is an invaluable, one-of-a-kind reference. Unlike most other books on the subject, The Atlantis Encyclopedia offers fewer theories and more facts. Although it does not set out to prove the sunken capital actually existed, The Atlantis Encyclopedia musters so much evidence on its behalf, even skeptics may conclude that there must be at least something factual behind such an enduring, indeed global legend. You'll learn: What was Atlantis? Where was it located? How long ago did it flourish? How was it destroyed? What became of its survivors? Have any remains of Atlantis ever been found? Will Atlantis ever be found? Did Atlantis have any impact on America?

By NY Times Bestselling Author Bob Mayer (author of the bestselling Area 51 series) #1 Kindle Science Fiction Bestseller on Atlantis "Spell-binding! Will keep you on the edge of your seat. Call it techno-thriller, call it science fiction, call it just terrific story-telling." Terry Brooks, #1 NY Times Bestselling author of the Shannara series and Star Wars Phantom Menace What if the Shadow that destroyed Atlantis 10,000 years ago, comes back to threaten our present world? A war beyond time. An enemy beyond space. A thriller beyond your wildest dreams. Three areas on the Earth's surface defy explanation: the Bermuda Triangle, the Devil's Sea of Japan, and a small region of Cambodia. Inside these realms, planes have disappeared, ships have vanished, and, in Cambodia, an entire civilization has been lost leaving behind Angkor Wat. In the present, former Green Beret Eric Dane teams up with the mysterious Sin Fen, a woman with powers he can't quite understand to fight the dark Shadow threatening the world. In the year 1,000 AD, a fearsome Viking Warrior, must protect a Seer from Valkyries, Kraken and other forces of legend and help her on a quest that connects through mysterious gates to Dane's battle in the present. All around the planet, at the junction of ley lines, and where tectonic plates join, black gates are opening, letting the dark Shadow into our world, threatening the very planet itself. Can Dane, Sin Fen, the Viking and the Seer, combine forces across a millennium to save the planet? If you enjoyed LOST, you'll love this book and be amazed at the similarities in concept (although this book was published before Lost). Aristotle considered Plato's Atlantis to be an invention; so we read time and again – but is this really true? Until the late 19th century, academia still held the opposite opinion. How did this shift in opinion take place? And was it justified? Over 100 works from the Atlantis and Aristotle literature, from antiquity to the Renaissance, from the 18th to the 21st century, were examined in order to track down the truth. A scientific adventure regarding Aristotle's opinion about Atlantis unfolds step by step, starting 200 years ago and reaching into the present. What did the great philosopher and disciple of Plato really think? All the relevant passages from Aristotle's works as well as all the steps taken during the literary research are documented in the appendix.

The adventure continues in the second installment of the Shades of Memnon series, where it is 1200 B.C. and a young Kushite must fight for his family's survival.
