Canada- and Alberta-bound travel queries both decreased week-over-week during this period (by 7% and 4% respectively, on average). This is likely due to the rising number of new cases in many provinces and new restrictions looming, as well as the arrival of the fall season and resultant colder temperatures.

Canadian Geography: A Scholarly Bibliography is a compendium of published works on geographical studies of Canada and its various provinces. It includes works on geographical studies of Canada as a whole, on multiple provinces, and on individual provinces. Works covered include books, monographs, atlases, book chapters, scholarly articles, dissertations, and theses. The contents are organized first by region into main chapters, and then each chapter is divided into sections: General Studies, Cultural and Social Geography, Economic Geography, Historical Geography, Physical Geography, Political Geography, and Urban Geography. Each section is further sub-divided into specific topics within each main subject. All known publications on the geographical studies of Canada—in English, French, and other languages—covering all types of geography are included in this bibliography. It is an essential resource for all researchers, students, teachers, and government officials needing information and references on the varied aspects of the environments and human geographies of Canada.

"This guidebook explores the natural splendour and diversity of Alberta by selecting 125 important places that are especially significant. Organized into four regions, each hot spot entry includes a descriptive destination profile, color photographs and a sidebar of at-a-glance information about special features and the location of the entry."--Provided by publisher.
