From girls' clothes to men's haircuts, from walking with girls to hanging with young men, *Butch* is a *Noun* chronicles the perplexities, dangers, and pleasures of living life outside the gender binary. This new edition includes a new introduction by the author.

Great design can be an agent of social change. The environmental crisis is the greatest issue of today, and according to author David Berman, consumerism is its largest cause ... often fuelled by convincing graphic and product design intended to invent 'needs'. Alternatively, creative professionals can use their skills to help spread messages and ideas the World really needs to hear, doing good by how we design and how we use design. This book offers a powerful and hopeful message that includes solutions that everyone will want to hear. In this provocative and dramatically-illustrated

book, David Berman argues that we live in an age where the democratisation of technology offers us each an opportunity to leave a greater legacy by the creative ideas we choose to share rather than the genes we strive to propagate. Indeed, the future of civilization has become our common design project. He believes that communications professionals have more conspicuous power than they realize, and play a core role in helping some corporations mislead audiences in order to invent unfulfilled 'needs' in larger and larger markets. In a World where design has become a recognized corporate asset, designers and their clients have the opportunity to use their persuasive skills responsibly and to accelerate awareness. Recent developments regarding professionalism and ethics offer powerful hope that there is great opportunity for designers and other professionals to choose what their still-young profession will be

For a century, almost all light-duty vehicles (LDVs) have been powered by internal combustion engines operating on petroleum fuels. Energy security concerns about petroleum imports and the effect of greenhouse gas (GHG) emissions on global climate are driving interest in alternatives. Transitions to Alternative Vehicles and Fuels assesses the potential for reducing petroleum consumption and GHG emissions by 80 percent across the U.S.

LDV fleet by 2050, relative to 2005. This report examines the current capability and estimated future performance and costs for each vehicle type and non-petroleum-based fuel technology as options that could significantly contribute to these goals. By analyzing scenarios that combine various fuel and vehicle pathways, the report also identifies barriers to implementation of these technologies and suggests policies to achieve the desired reductions. Several scenarios are promising, but strong, and effective policies such as research and development, subsidies, energy taxes, or regulations will be necessary to overcome barriers, such as cost and consumer choice.

Is it still possible to fake your own death in the twenty-first century?
With six figures of student loan debt, Elizabeth Greenwood was

tempted to find out. So off she sets on a darkly comic foray into the world of death fraud, where for \$30,000 a consultant can make you disappear--but your suspicious insurance company might hire a private detective to dig up your coffin...only to find it filled with rocks. Greenwood tracks down a British man who staged a kayaking accident and then returned to live in his own house while all his neighbors thought he was dead. She takes a call from Michael Jackson (no, he's not dead--or so her new acquaintances would have her believe), stalks message boards for people contemplating pseudocide, and gathers intel on black market morgues in the Philippines, where she may or may not obtain some fraudulent goodies of her own. Along the way, she learns that love is a much less common motive than money, and that making your death look like a drowning virtually guarantees that you'll be

caught. (Disappearing while hiking, however, is a way great to go.)
Playing Dead is a charmingly bizarre investigation in the vein of
Jon Ronson and Mary Roach into our all-too-human desire to
escape from the lives we lead, and the men and women desperate
enough to give up their lives--and their families--to start again.
"Delivers all the lo-fi spy shenanigans and caught-red-handed
schadenfreude you're hoping for." --NPR "A lively romp." --The
Boston Globe "Grim fun." --The New York Times "Brilliant topic,
absorbing book." --The Seattle Times "The most literally escapist
summer read you could hope for." --The Paris Review

her first short story collection, she combines her power of observation and her inimitable voice to mine the fraught and complex experience of life in the modern world. Interleaving eleven completely new and unpublished stories with some of her best-loved pieces from *The New Yorker* and elsewhere, Smith presents a dizzyingly rich and varied collection of fiction. Moving exhilaratingly across genres and perspectives, from the historic to the vividly current to the slyly dystopian, *Grand Union* is a sharply alert and prescient collection about time and place, identity and rebirth, the persistent legacies that haunt our present selves and the uncanny futures that rush up to meet us. Nothing is off limits, and everything—when captured by Smith's brilliant gaze—feels fresh and relevant. Perfectly paced and utterly original, *Grand Union* highlights the wonders Zadie Smith can do.

From award-winning musician and composer Warren Ellis comes the unexpected and inspiring story of a piece of chewing gum. Featuring an introduction from Nick Cave. 'Warren has turned this memento, snatched from his idol's piano in a moment of rapture, into a genuine religious artefact.' NICK CAVE 'In praise of meaning-rich relics and magical things. Totally heartwarming project.' MAX PORTER 'A unique study of a fan's devotion, of transcendence and of the artistic vocation - it's got depth and great warmth. It's a beautiful piece of work.' KEVIN BARRY On Thursday 1 July, 1999, Dr Nina Simone gave a rare performance as part of Nick Cave's Meltdown Festival. After the show, in a state of awe, Warren Ellis crept onto the stage, took Dr Simone's piece of chewed gum from the piano, wrapped it in her stage towel and put it

in a Tower Records bag. The gum remained with him for twenty years; a sacred totem, his creative muse, growing in significance with every passing year. In 2019, Cave - his collaborator and great friend - asked Warren if there was anything he could contribute to display in his Stranger Than Kindness exhibition. Warren realised the time had come to release the gum. Together they agreed it should be housed in a glass case like a holy relic. Worrying the gum would be damaged or lost, Warren decided to first have it cast in silver and gold, sparking a chain of events that no one could have predicted, one that would take him back to his childhood and his relationship to found objects. Nina Simone's Gum is about how something so small can form beautiful connections between people. It is a story about the meaning we place on things, on experiences, and how they become imbued with spirituality. It is a celebration of

This work shows how the various elements of consumer analysis fit together in an integrated framework, called the Wheel of Consumer Analysis. Psychological, social and behavioural theories are shown as useful for understanding consumers and developing more effective marketing strategies. The aim is to enable students to develop skills in analyzing consumers from a marketing management perspective and in using this knowledge to develop and evaluate marketing strategies. The text identifies three groups of concepts - affect and cognition, behaviour and the environment - and shows how these they influence each other as well as marketing strategy. The focus of the text is managerial, with a distinctive emphasis on strategic issues and problems. Cases and questions are
