No other photographer in modern times has recorded war and its aftermath as widely and unsparingly as Don McCullin. After a childhood in London during the Blitz, and after the hardships of evacuation, McCullin feels his life has indeed been shaped by war. From the building of the Berlin Wall at the height of the Cold War to El Salvador and Kurdistan, McCullin has covered the major conflicts of the last fifty years, with the notable exception of the Falklands, for which he was denied access. His pictures from the Citadel in Hue

and in the ruins of Beirut are among the most unflinching records of modern war. The publication of many of his greatest stories in the Sunday Times magazine did much to raise the consciousness of a generation, even if he himself now fears that photographs cannot prevent history from repeating itself. The brutality of conflict returns over and over again. McCullin here voices his despair. McCullin recounts the course of his professional life in a series of devastating texts on war, the events and the power of photography. The conclusion of the book marks McCullin's retreat to the Somerset landscape surrounding his home, where the dark skies over England remind him yet again of images of war. Despite the sense of belonging and even contentment, for him there is no final escape.

Explores whether sufficient data exists to examine the temporal and spatial relationships that existed in terrorist group planning, and if so, could patterns of preparatory conduct be identified? About one-half of the terrorists resided, planned, and prepared for terrorism relatively close to their eventual target. The terrorist groups existed for 1,205 days from the first planning meeting to the date of the actual/planned terrorist incident. The planning process for specific acts began 2-3 months prior to the terrorist incident. This study examined selected terrorist groups/incidents in the U.S. from 1980-2002. It provides for the potential to identify patterns of conduct that might lead to intervention prior to the commission of the actual terrorist incidents. Illustrations.

Thirty years after its publication, *The Death and Life of Great American Cities* was described by *The New York Times* as "perhaps the most influential single work in the history of town planning....[It]

can also be seen in a much larger context. It is first of all a work of literature; the descriptions of street life as a kind of ballet and the biting satiric account of traditional planning theory can still be read for pleasure even by those who long ago absorbed and appropriated the book's arguments." Jane Jacobs, an editor and writer on architecture in New York City in the early sixties, argued that urban diversity and vitality were being destroyed by powerful architects and city planners. Rigorous, sane, and delightfully epigrammatic, Jacobs's small masterpiece is a blueprint for the humanistic management of cities. It is sensible, knowledgeable, readable, indispensable. The author has written a new foreword for this Modern Library edition.
