This—revised and enhanced—book examines the role of finance in supporting other functional areas while fostering an understanding of how financial decisions can create value. Corporate Finance covers areas related to estimating divisional cost of capital; executing a financing strategy; establishing debt and dividend policies consistent with the company’s strategy and environment; choosing between dividends and stock repurchases; managing high growth and managing working capital. Its new topics include: - Corporate Financial Flexibility (Real options) - New Financial Instruments - Project Finance - Acquisitions and Control - Performance Measurement and Incentive Compensation The goal of this book is to provide a thorough understanding of how and why firms make their financial decisions the way they do and their impact on shareholder value. The central theme of the book is Value Based Management, which assumes that maximizing shareholder value is the governing objective of a firm. Each chapter of this new edition has detailed and real-life cases to help students easily understand and grasp concepts. The author has also provided the case-map of the Harvard Business School to make this book more user-friendly in classrooms. The inclusion of several new topics/cases, extensive pedagogical tools and a finance-for-non-finance approach make this book ideal for MBA/CA/CFA/ICWA students and executive education programs.

In Business Environment, A. C. Fernando integrates concepts with real-world situations and the most recent data to help students grasp complex economic concepts, a clear understanding of which is required to comprehend the various facets of busine

Group theory is one of the most fundamental branches of mathematics. This highly accessible volume of the Encyclopaedia is devoted to two important subjects within this theory. Extremely useful to all mathematicians, physicists and other scientists, including graduate students who use group theory in their work.

This broad-ranging volume fundamentally covers all the variable factors of development and advancement of the promising technology of FTTH, which will be the key broadband telecom access technique to the end users of the future.

This book includes selected papers from the International Conference on Data Science and Intelligent Applications (ICDSIA 2020), hosted by Gandhinagar Institute of Technology (GIT), Gujarat, India, on January 24–25, 2020. The proceedings present original and high-quality contributions on theory and practice concerning emerging technologies in the areas of data science and intelligent applications. The conference provides a forum for researchers from academia and industry to present and share their ideas, views and results, while also helping them approach the challenges of technological advancements from different viewpoints. The contributions cover a broad range of topics, including: collective intelligence, intelligent systems, IoT, fuzzy systems, Bayesian networks, ant colony optimization, data privacy and security, data mining, data warehousing, big data analytics, cloud computing, natural language processing, swarm intelligence, speech processing, machine learning and deep learning, and intelligent applications and systems. Helping strengthen the links between academia and industry, the book offers a valuable resource for instructors, students, industry practitioners, engineers, managers, researchers, and scientists alike.

The Standard for Business Analysis – First Edition is a new PMI foundational standard, developed as a basis for business analysis for portfolio, program, and project management. This standard illustrates how project management processes and business analysis processes are complementary activities, where the primary focus of project management processes is the project and the primary focus of business analysis processes is the product. This is a process-based standard, aligned with A Guide to the Project Management Body of Knowledge (PMBOK® Guide) – Sixth Edition, and to be used as a standard framework contributing to the business analysis body of knowledge.

About the Book: Financial management is a core subject which provides unavoidable part of the overall business management. This book adopts a fresh and innovative approach to the study of financial management for the students of B.Com., B.B.A., M.Com., M.B.A. and other professional courses like C.A., ICWA, C.S. The text is presented in the simplest language with easy concepts. Each paragraph has been arranged under a suitable heading for quick retention of concepts. This book also contains the suitable illustrations, solved problems and model questions.

What if co-incidences in our lives are nothing but a result of a dice thrown by some higher being? What if, to the heavens, our lives are nothing but rows of dominos ready to be put into action? What if we all are mere pieces of pawns carefully played upon by a cosmic chessmaster? 'That Thing About You' is an uncommon story of a common man rejected in love. This is a story of a man walking on the path of self-discovery. Subodh, a regular IT employee, is perceived as an immature man by everyone, but he isn't bothered until his love interest rejects him citing the same. Although dejected and crestfallen, he soon befriends an unusual, mysterious woman who knows everything about him and seems to have all the answers. Soon, his life goes through a lot of unexpected turns—from doubting his sanity and visiting a psychologist to a failed arranged marriage attempt made by his parents. Everything in his life seems to be in fast-forward mode. One thing that does not change, however, is this unusual "friend" of his who refuses to reveal her identity and chooses to appear at her whim. Who is this mysterious woman? Why is she prying into his life? Where will this strange friendship lead him? Is some impending danger awaiting Subodh or is it something else altogether?
