"[Cass's] core principle--a culture of respect for work of all kinds--can help close the gap dividing the two Americas...." - William A. Galston, The

Brookings Institution The American worker is in crisis. Wages have stagnated for more than a generation. Reliance on welfare programs has surged. Life expectancy is falling as substance abuse and obesity rates climb. These woes are not the inevitable result of irresistible global and technological forces. They are the direct consequence of a decades-long economic consensus that prioritized increasing consumption--regardless of the costs to American workers, their families, and their communities. Donald Trump's rise to the presidency focused attention on the depth of the nation's challenges, yet while everyone agrees something must change, the Left's insistence on still more government spending and the Right's faith in still more economic growth are recipes for repeating the mistakes of the past. In this groundbreaking re-evaluation of American society, economics, and public policy, Oren Cass challenges our basic assumptions about what prosperity means and where it comes from to reveal how we lost our way. The good news is that we can still turn things around--if the nation's proverbial elites are willing to put the American worker's interests first. Which is more important, pristine air quality, or well-paying jobs that support families? Unfettered access to the cheapest labor in the world, or renewed investment in the employment of Americans? Smoothing the path through college for the best students, or ensuring that every student acquires the skills to succeed in the modern economy? Cutting taxes, expanding the safety net, or adding money to low-wage paychecks? The renewal of work in America demands new answers to these questions. If we reinforce their vital role, workers supporting strong families and communities can provide the foundation for a thriving, self-sufficient society that offers opportunity to all.

"A timely and smart discussion of how different cities and regions have made a changing economy work for them – and how policymakers can learn from that to lift the circumstances of working Americans everywhere."—Barack Obama We're used to thinking of the United States in opposing terms: red versus blue, haves versus have-nots. But today there are three Americas. At one extreme are the brain hubs—cities like San Francisco, Boston, and Durham—with workers who are among the most productive, creative, and best paid on the planet. At the other extreme are former manufacturing capitals, which are rapidly losing jobs and residents. The rest of America could go either way. For the past thirty years, the three Americas have been growing apart at an accelerating rate. This divergence is one the most important developments in the history of the United States and is reshaping the very fabric of our society, affecting all aspects of our lives, from health and education to family stability and political engagement. But the winners and losers aren't necessarily who you'd expect. Enrico Moretti's groundbreaking research shows that you don't have to be a scientist or an engineer to thrive in one of the brain hubs. Carpenters, taxi-drivers, teachers, nurses, and other local service jobs are created at a ratio of five-to-one in the brain hubs, raising salaries and standard of living for all. Dealing with this split—supporting growth in the hubs while arresting the decline elsewhere—is the challenge of the century, and *The New Geography of Jobs* lights the way.

Can't find a job? Maybe you're seeing only half the picture! Financial collapses—whether of the junk bond market, the Internet bubble, or the highly leveraged housing market—are often explained as the inevitable result of market cycles: What goes up must come down. In *Liquidated*, Karen Ho punctures the aura of the abstract, all-powerful market to show how financial markets, and particularly booms and busts, are constructed. Through an in-depth investigation into the everyday experiences and ideologies of Wall Street investment bankers, Ho describes how a financially dominant but highly unstable market system is understood, justified, and produced through the restructuring of corporations and the larger economy. Ho, who worked at an investment bank herself, argues that bankers' approaches to financial markets and corporate America are inseparable from the structures and strategies of their workplaces. Her ethnographic analysis of those workplaces is filled with the voices of stressed first-year associates, overworked and alienated analysts, undergraduates eager to be hired, and seasoned managing directors. Recruited from elite universities as "the best and the brightest," investment bankers are socialized into a world of high risk and high reward. They are paid handsomely, with the understanding that they may be let go at any time. Their workplace culture and networks of privilege create the perception that job insecurity builds character, and employee liquidity results in smart, efficient business. Based on this culture of liquidity and compensation practices tied to profligate deal-making, Wall Street investment bankers reshape corporate America in their own image. Their mission is the creation of shareholder value, but Ho demonstrates that their practices and assumptions often produce crises instead. By connecting the values and actions of investment bankers to the construction of markets and the restructuring of U.S. corporations, *Liquidated* reveals the particular culture of Wall Street often obscured by triumphalist readings of capitalist globalization.

The world needs a strong America, and America needs an economic revival after the Coronavirus season of shutdowns. Can the playbook that resulted in the greatest job market in history put Americans back to work? From the first moments of his presidency, Donald J. Trump put US economic revival at the top of his agenda. Cutting red tape and slashing business tax rates made companies eager to locate in America again. A surge in corporate investment led to record numbers of US job openings. But there was also another force at work at the start of the Trump era, and it's impossible to provide a fair accounting of Trump's governance without noting the unique obstacles he's faced. The President's critics styled themselves "The Resistance," as if they were confronting a tyrant at the head of an invading army rather than their duly elected President. Much of the media establishment regularly—and wrongly—accused him of betraying the country. Most disturbing was the resistance movement inside government, formed even before the 2016 election, which unleashed unprecedented surveillance against Donald Trump. The political and media warfare has never ended. Just as an impeachment case collapsed in the Senate earlier this year, the world was beginning to realize how large a threat the Chinese communist government had become—and what it had been hiding in Wuhan. The destruction caused by the coronavirus is the latest and greatest test for the Trump prosperity agenda. Once again the health and wealth of the world depend on US leadership for economic revival. This is the story of the man US voters chose to lead in 2016 and will soon consider to lead again.
