EVETS Physics & Chemistry question paper will content total 50 questions (25 from Physics and 25 from Chemistry). Every question will carry 2 marks. Show the total marks will you 100 and the duration of the exam will be two hours. All the questions are of objective type having four answers of options for each, only one option is correct.

Celebrated by medical students for over a decade, Kaplan's pocket-sized Dr. Pestana's Surgery Notes is the highest-yield surgery review for the shelf and USMLE Step 2 CK exams. The Best Review Concise high-yield review of core surgery material 180 up-to-date vignettes for self-testing 16 brief essays examining selected diagnostic and therapeutic tools from a surgical perspective NEW essay topic: nutritional support of the surgical patient

EXPANDED and enhanced bariatric surgery chapter Revised content review throughout, including: therapies for childhood leukemia, ARDS, non-small cell lung cancer, aortoenteric fistula, gout, BPH, prolapsed hemorrhoids, rectal prolapse, and anal fissures, and trends in whole blood availability and use Expert Guidance Revised and fully up-to-date content from distinguished surgery instructor Dr. Carlos Pestana For over a decade, Dr. Pestana's Surgery Notes has helped med students excel on the surgery shelf exam and USMLE Step 2 CK

In his monumental 1687 work *Philosophiæ Naturalis Principia Mathematica*, known familiarly as the *Principia*, Isaac Newton laid out in mathematical terms the principles of time, force, and motion that have guided the development of modern physical science. Even after more than three centuries and the revolutions of Einsteinian relativity and quantum mechanics, Newtonian physics continues to account for many of the phenomena of the observed world, and Newtonian celestial dynamics is used to determine the orbits of our space vehicles. This completely new translation, the first in 270 years, is based on the third (1726) edition, the final revised version approved by Newton; it includes extracts from the earlier editions, corrects errors found in earlier versions, and replaces archaic English with contemporary prose and up-to-date mathematical forms. Newton's principles describe acceleration, deceleration, and inertial movement; fluid dynamics; and the motions of the earth, moon, planets, and comets. A great work in itself, the *Principia* also revolutionized the methods of scientific investigation. It set forth the fundamental three laws of motion and the law of universal gravity, the physical principles that account for the Copernican system of the world as emended by Kepler, thus effectively ending controversy concerning the Copernican planetary system. The illuminating *Guide to the Principia* by I. Bernard Cohen, along with his and Anne Whitman's translation, will make this preeminent work truly accessible for today's scientists, scholars, and students.

Quantum theory confronts us with bizarre paradoxes which contradict the logic of classical physics. At the subatomic level, one particle seems to know what the others are doing, and according to Heisenberg's "uncertainty principle", there is a limit on how accurately nature can be observed. And yet the theory is amazingly accurate and widely applied, explaining all of chemistry and most of physics. "Introducing Quantum Theory" takes us on a step-by-step tour with the key figures, including Planck, Einstein, Bohr, Heisenberg and Schrodinger. Each contributed at least one crucial concept to the theory. The puzzle of the wave-particle duality is here, along with descriptions of the two questions raised against Bohr's "Copenhagen Interpretation" - the famous "dead and alive cat" and the EPR paradox. Both remain unresolved.

Lakhmir Singh's Science is a series of books which conforms to the NCERT syllabus. The main aim of writing this series is to help students understand difficult scientific concepts in a simple manner in easy language. The ebook version does not contain CD.

Consists of 11 years solved papers (All 4 papers of Feb, May, Sept and Dec.) of MAT distributed in 23 topics. Just revise one topic and then solve previous year questions of CAT on that topic. Covers all the 4 papers conducted each year - Feb, May, Sep and Dec.
